CHAPTER 1

Introduction to GIS and ArcGIS 1

What is special about GIS? 1

GIS defined 2

Maps and more... 3

Spatial analysis 5

Evolution of interface design 8

Desktop ArcGIS 9

Overview 9

ArcMap basics 11

ArcCatalog basics 19

Geoprocessing 25

Extensions 27

Key changes in v9 28

Key changes in v8 29

File and path names in ArcGIS 32

CHAPTER 2

Data models and structures 35

Representing geographic features 35

Where, what, and when 36

Human cognition of geographic features 36

Feature data structures 38

Geometric data structure 38

Topological data structure 44

Network 50

Surface 53

Object-oriented data structure 54

Spatial index 59

Supported feature data structures 61

Field data structures 62

Non-spatial (attribute) data 63

Data types 64

Relating tables 66

Tables in ArcGIS 68

GRID attribute table 76

Importing spatial data 77

Importing feature data 78

CHAPTER 3 *Coordinate systems, projections, and GPS* **81**

- Location, location, location... **81**
- Scale **82**
 - Scale in a digital world* **84**
- Geographic coordinate systems **86**
 - Spheroids and datums* **87**
- The Global Positioning System (GPS) **88**
- Projected coordinate systems **91**
 - Properties and characteristics* **91**
 - Projection types* **92**
 - Distortion patterns* **95**
 - Selecting a projection* **96**
 - Commonly used projections* **96**
- Changing coordinate systems **102**
 - Projection definition file* **102**
 - Permanent projection* **104**
 - Temporary, on the fly, projection* **105**

CHAPTER 4 *Visualization of spatial data* **107**

- Overview **107**
- Thematic mapping **110**
 - Features map type* **111**
 - Categories map type* **113**
 - Quantities map type* **115**
 - Charts* **129**
 - Multiple attributes map type* **130**
 - Symbology* **130**
 - Styles* **138**
- Landform maps **138**
- Labeling maps **141**
 - Dynamic labels* **142**
 - Annotation* **143**
- Graphs **143**
- Map layout **147**
 - Templates* **148**
- Exporting and printing **150**

Creating interactive maps 153

CHAPTER 5 *Querying a map* 157

Overview 157

Selection method 157

Where is...? Where are...? 159

Find 159

Select by attributes (SQL) 160

Definition query 165

What is here? 166

Identify 166

Interactive selection 167

How big? 169

How far? 170

What features are near another feature? 171

Spatial relation types 172

Buffered selections 173

Examples of common selections 173

What is adjacent? 174

CHAPTER 6 *Creating and editing feature data* 177

Overview 177

Creating a new dataset 177

Creating a new dataset 178

Converting a dataset 181

Sub-setting a dataset 182

Topology revisited 183

Feature-oriented editing 186

Feature editing basics 188

Starting an edit session 188

Snapping environment 189

Common editing tasks 190

Adding new features 190

Splitting a feature 194

Deleting features 195

	<i>Modifying features</i>	195
	<i>Removing an overlap</i>	198
	<i>Removing a sliver polygon</i>	198
	<i>Patching a gap</i>	200
	<i>Integration</i>	200
	<i>Changing feature order</i>	202
Map topology		202
	<i>Topology rules</i>	203
	<i>Cluster tolerance</i>	207
	<i>Topological or shared editing</i>	207
Geocoding		209
	<i>Geocoding services</i>	211
Editing attribute data		212
	<i>Common problems with calculator expressions</i>	214
	<i>Advanced calculator expressions</i>	214

CHAPTER 7

<i>Raster basics</i>	223
Overview	223
Raster representation	223
<i>GRID</i>	225
<i>Images</i>	231
Raster symbology	234
Analysis environment	236
<i>Analysis extent</i>	237
<i>Cell size</i>	238
Raster-vector conversion	239
<i>Vector to raster</i>	240
<i>Raster to vector</i>	242
<i>Image-GRID conversion</i>	243
Local functions	243
<i>Cell Statistics</i>	244
<i>Reclassification</i>	246
Focal functions	248
<i>Neighborhood functions</i>	250
<i>Neighborhood statistics</i>	251
Zonal functions	252
<i>Zonal statistics</i>	253

Global functions	254
Distance	254
Density	263
Surface analysis	265
Surface generation (interpolation)	277

CHAPTER 8 *Advanced raster analysis* **285**

Overview	285
Advanced raster analysis	286
Map algebra	286
Raster Calculator	287
Integer and floating-point math	289
Advanced map algebra expressions	290
Importing raster data	313

CHAPTER 9 *Single-layer analysis* **315**

Overview	315
Summarizing attributes	315
Basic statistics	316
Summarize	318
Measurement	319
Number	319
Area	320
Length	320
Shape	321
Fragmentation	323
Distance	328
Pattern	330
Proximity analysis	334
Buffering	335
Variable buffers	338
Neighborhoods	340
Transformations	340
Feature center and centroid	341
Dissolve	343
Eliminate	343

Generalization 344
Resampling 344

CHAPTER 10 *Dual-layer analysis* **347**

Overview 347
Overlay analysis 347
 Clip 349
 Intersect 353
 Union 355
 Merge 357
Join by location 358
 Nearest feature 359
 Intersecting a feature 359
 Inside a polygon 360

CHAPTER 11 *Spatial modeling and geoprocessing* **361**

Overview 361
Modeling concepts 362
 Flow charts 362
 Boolean model 365
 Arithmetic model 367
 Weighted arithmetic model 370
Evolution of user interfaces in GIS 372
ModelBuilder 374
 Basics of ModelBuilder 374
 Modeling accessibility -- an illustration of iterative modeling 390
Programming models using Python 403
 Why use Python? 403
 Basics of Python programming 405
 Arguments 415
 Connecting Python with ArcGIS 416
 Debugging tips 428
Ten ways to improve your ArcGIS experience 429
