1 *Introduction to GIS and ArcGIS* 1

GIS defined: what is where and why 1

Maps and more... 2

GIS functions 4

Spatial analysis 5

A brief history of GIS 8

Evolution of interface design 9

Desktop ArcGIS 11

Overview and terminology 11

ArcMap basics 13

ArcCatalog basics 21

Metadata 25

ArcToolbox and geoprocessing 27

Extensions 29

Chapter review 30

2 *Geographic data* 31

Representing geography 31

Where, what, and when? 31

Discrete or continuous geographic features 32

Vector 34

Geometric (non-topological) data structure 35

Topological data structure 45

Spatial indexing 54

Raster 55

GRID 61

Geodatabase raster 62

Images 62

Attribute (non-spatial) data 63

Data types 64

Tables in ArcGIS 65

Attribute fields 66

Selections and the selection set 70

Editing a table 71

Relating tables 71

Importing and exporting tables 73

Chapter review 75

3

Scale, coordinate systems, and projections 77

Location, location, location... 77

Scale 79

Scale in a digital world 81

Geographic coordinate systems 82

Spheroids and datums 83

Projected coordinate systems 85

Properties and characteristics 86

Projection types 86

Distortion patterns 89

Selecting a projection 90

Commonly used projections 90

Changing coordinate systems 96

Projection definition file 96

Permanent projection 98

Temporary, on the fly, projection 99

The Global Positioning System (GPS) 99

Geocoding 103

Geocoding services 104

Chapter review 105

4

Cartography and geographic visualization 107

The art and science of cartography 107

Thematic mapping 110

General features 111

Categories 113

Mapping quantities 115

Symbolizing data 133

Advanced symbology 137

Multiple attributes map type 139

- Landform maps 141
- Labeling maps 143
 - Dynamic labels* 145
 - Annotation* 146
 - Label expressions* 147
- Map layout 147
 - Templates* 148
- Exporting and printing 150
 - Creating interactive maps* 154
- Graphs 157
- Chapter review 161

5 *Querying spatial data* 163

- Selection method 164
- What is here? 166
 - Identify* 166
 - Interactive selection* 167
- How big? How long? How far? 169
- Where is...? Where are...? 170
 - Find* 171
 - Select By Attributes* 173
 - Definition query* 177
- What features are near another feature? 178
 - Spatial relation types* 179
 - Examples of common selections* 180
 - What is adjacent?* 181
- Chapter review 181

6 *Acquiring, editing, and creating vector datasets* 183

- Acquiring existing datasets 184
 - FTP or seamless?* 185
 - ESRI Data and Maps* 185
 - Government sources and clearinghouses* 185

<i>Commercial</i>	186
<i>Data download lists</i>	186
Converting a dataset	186
Sub-setting a dataset	188
Editing and topology	189
Feature-oriented digitizing	192
Feature editing basics	194
<i>Starting an edit session</i>	194
<i>Setting the snapping environment</i>	195
<i>Adding new features</i>	195
Common editing tasks	199
<i>Splitting a feature</i>	199
<i>Deleting features</i>	200
<i>Modifying features</i>	200
<i>Removing an overlap</i>	203
<i>Removing a sliver polygon</i>	203
<i>Patching a gap</i>	205
<i>Integration</i>	206
Map topology	207
<i>Topology rules</i>	208
<i>Cluster tolerance</i>	213
<i>Topological or shared editing</i>	213
Creating a new dataset	215
Creating and editing attribute data	217
<i>Field calculator</i>	218
<i>Calculate geometry</i>	220
<i>Common problems with calculator expressions</i>	221
<i>Advanced calculator expressions</i>	221
Chapter review	230

7

Raster analysis 231

Raster representation	231
<i>GRIDs</i>	235
<i>Geodatabase raster</i>	237
<i>ASCII format</i>	238
<i>Images</i>	239

Symbology	240
Analysis environment	241
<i>Analysis extent</i>	243
<i>Cell size</i>	243
Functions	244
<i>Local functions</i>	245
<i>Neighborhood functions</i>	250
<i>Zonal functions</i>	254
<i>Global functions</i>	257
Raster/vector conversions	290
<i>Vector to raster</i>	290
<i>Raster to vector</i>	292
<i>Image-GRID conversion</i>	293
Advanced raster processing and map algebra	293
<i>Raster Calculator</i>	294
<i>Integer and floating-point math</i>	297
<i>Advanced map algebra expressions</i>	297
<i>Randomization</i>	304
Chapter review	321

8

Single-layer analysis 323

Geoprocessing basics	323
<i>Auto-documentation through History</i>	324
<i>Batch geoprocessing</i>	325
Summarizing attributes	325
<i>Basic statistics</i>	325
<i>Summarize</i>	328
Measurement	329
<i>Number</i>	329
<i>Area</i>	329
<i>Length</i>	330
<i>Shape</i>	331
<i>Fragmentation</i>	333
<i>Distance</i>	337
<i>Pattern</i>	339
Proximity analysis	342
<i>Buffering</i>	343

<i>Variable buffers</i>	345
<i>Neighborhoods</i>	346
Transformations	347
<i>Feature center and centroid</i>	348
<i>Dissolve</i>	350
<i>Eliminate</i>	350
<i>Generalization</i>	351
<i>Resampling</i>	352
Chapter review	353

9 *Dual-layer analysis* **355**

Overlay analysis	355
<i>Clip</i>	359
<i>Intersect</i>	361
<i>Union</i>	363
<i>Merge/append</i>	364
Join by location	365
<i>Nearest feature</i>	367
<i>Intersecting a feature</i>	367
<i>Inside a polygon</i>	368
Chapter review	368

10 *Spatial modeling and geoprocessing* **369**

Modeling concepts	370
<i>Flow charts</i>	370
<i>Boolean model</i>	373
<i>Arithmetic model</i>	375
<i>Weighted arithmetic model</i>	378
Evolution of user interfaces in GIS	380
ModelBuilder	381
<i>Modeling accessibility -- an illustration of iterative modeling</i>	382
Advanced ModelBuilder techniques	395
Programming scripts using Python	396
<i>Why use Python?</i>	396
<i>Basics of Python programming</i>	397

Arguments 407
Connecting Python with ArcGIS 408
Debugging tips 421
Ten ways to improve your ArcGIS experience 422
